

Sardar Patel Institute of Technology

Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India
(Autonomous Institute Affiliated to University of Mumbai)

Syllabus for Humanities, Social Science and Management (HSSM) Electives (W.E.F. 2023 to 2027 Batch)

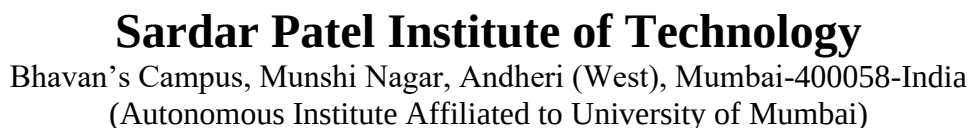

Course Code	Course Name	Credits	Sem.	Mode
HSM11	Finance for Engineers-I	2	III	Offline
HSM12	Finance for Engineers-II	2	IV	Offline
HSM21	Economics for Engineers-I	2	III	Offline
HSM22	Economics for Engineers-II	2	IV	Offline
HSM31	Psychology-I	2	III	Offline
HSM32	Psychology-II	2	IV	Offline
HSM41	Law for Engineers-I	2	III	Online
HSM42	Law for Engineers-II	2	IV	Online
HSM51	Sanskrit-I	2	III	Offline
HSM52	Sanskrit-II	2	IV	Offline
HSM61	French Language-I	2	III	Offline
HSM62	French Language-II	2	IV	Offline
HSM71	German Language-I	2	III	Online
HSM72	German Language-II	2	IV	Online
HSM81	Japanese Language-I	2	III	Offline
HSM82	Japanese Language-II	2	IV	Offline
HSM91 *	SWAYAM/NPTEL(HSSE/Management)	2	III	Online
HSM92 *	SWAYAM/NPTEL(HSSE/Management)	2	IV	Online

* HSM91 and HSM92: These courses are from SWAYAM/ NPTEL Online Platform, conducted by centrally funded institutes like IIT's. Students desirous to take these courses must complete the required course and produce the completion certificate. Students must complete an 8-week course (for 2 credits) from HSS/Management Discipline.

(For reference,

https://docs.google.com/spreadsheets/d/e/2PACX-1vSPMVrWoo0ZsAac7v1Cxx5bZ4qFUVTRpc5hjGr-krusAZcY_M70guTum2z7S2SmdsbpmgD7WbL_3aNU/pubhtml

Note: Any course once completed, cannot be repeated elsewhere (e.g. LLC, Multidisciplinary Minor etc. If repeated, the credits will not be counted.)

* ISE will be evaluated based on the marks scored in assignments/presentations/group discussion, out of 150.

These courses enlighten students with fundamental knowledge of Finance that would be relevant for their personal as well as professional transactions as Engineers.

- 1) Basics of Financial Statement
- 2) Working Capital
- 3) Costing Concepts

Finance For Engineers II is a Humanities and Social Sciences course being offered to 3rd to 5th semester B. Tech. students as a sequel of two courses of 2 credits each.

These courses enlighten students with fundamental knowledge of Finance that would be relevant for their personal as well as professional transactions as Engineers.

The Module-II syllabus covers topics related to Project Finance & Personal Finance, such as:-

- 1) Sources of Financing
- 2) Capital Budgeting
- 3) Wealth Management

Pre-requisite Course Codes, if any.	
Course Objective:	
Course Outcomes (CO): At the end of the course students will be able to	
CO1	Understand various Capital Raising Methods
CO2	Understand Capital Investment Techniques, Calculate Cost of Capital
CO3	Prepare Personal Financial Plan
CO4	Calculate Income Tax & prepare ITR

Economics for Engineers is a Humanities and Social Sciences course being offered to 3rd and 4th semester B. Tech. students as a sequel of three courses of 2 credits each.

Economics for Engineers is designed to provide engineering students with basic knowledge and understanding of economic principles, concepts, and tools. The course aims to enhance their decision-making skills by integrating economic analysis into engineering problem-solving. This course highlights the relevance of economics in various engineering contexts and equips students with the necessary skills to evaluate economic feasibility, cost-benefit analysis, and project evaluation. Throughout the course, students will engage in case studies, discussions, and practical exercises to apply economic concepts to engineering projects.

Pre-requisite Course Codes, if any.		
Course Objective:		
Course Outcomes (CO): At the end of the course students will be able to		
CO1	Understand the fundamental economic concepts applicable to engineering.	
CO2	Analyze and evaluate the economic feasibility of engineering projects.	
CO3	Apply economic tools to make informed engineering decisions.	
CO4	Identify economic factors affecting engineering industries and sectors.

Psychology is a Humanities and Social Sciences course being offered to B. Tech and MCA students as a sequel of two courses of 2 credits each. These courses enlighten students with fundamental principles of human behavior in social and organizational contexts.

We all know Engineers are the architects of our future, designing the structures, systems, and technologies that shape the world around us. Yet, behind every blueprint and innovation lies the intricate web of human interaction and organizational dynamics. This course aims in making students understand these elements which are crucial for success in the engineering profession

Pre-requisite Course Codes, if any.	
Course Objective:	
Course Outcomes (CO): At the end of the course students will be able to	
CO1	Understand the concepts of human behavior and have insight how human beings feel think and behave in diverse social situations.
CO2	To understand the basic cognitive process that guide human behavior
CO3	The knowledge will be useful in in tackling everyday situations and attaining optimal solutions
CO4	Knowledge can also be used by engineers in designing sophisticated Artificial intelligence (AI)systems that learn from mistakes and make our lives lot easier to live

The course "Law for Engineers" falls under the Humanities and Social Sciences category and is available to 3rd and 4th semester B.Tech. students. It builds upon two previous courses, each worth 2 credits. Through this curriculum, students gain essential insights into Indian legal principles crucial for their future roles as engineers. Topics covered include an overview of the Indian Legal System, exploration of jurisprudential theories, corporate and commercial laws, information technology law, Intellectual Property Rights, and other pertinent Indian laws pertinent to engineering practices.

Pre-requisite Course Codes, if any.	Nil
Course Outcomes (CO): At the end of the course students will be able to	
CO1	Recognize and investigate fundamental aspects and structures of the Indian constitution.
CO2	Distinguish and establish connections between the operations of legal systems.
CO3	Evaluate different categories of contracts as outlined in the Indian Contract Act.
CO4	Comprehend the importance of the Right to Information Act.

Program Outcomes (PO):

PO1: Engineering Knowledge: The ability to apply knowledge of mathematics, engineering and science to solve complex engineering problems.

PO2: Problem Analysis: The ability to identify, formulate and analyze engineering problems.

PO3: Design/development of Solutions: The ability to design a system, component, or process to meet desired needs within realistic constraints such as environmental, social, ethical.

PO4: Conduct Investigations of Complex Problems: Ability to conduct investigation of complex problems and find appropriate solution leading to valid conclusion.

PO5: Modern Tool usage: An ability to use the techniques, skills, and modern engineering tools necessary for telecom engineering practice.

PO6: The Engineer and Society: Ability to be aware of societal, health, safety, cultural, legal issues and responsibilities relevant to professional engineering practice.

PO7: Environment and Sustainability: The broad education necessary to understand the impact of engineering solutions in environmental and societal context.

PO8: Ethics: Apply professional ethics to engineering practices.

PO9: Individual and Team Work: The ability to function in multi-disciplinary teams by involving in technical activities.

PO10: Communication: The ability to comprehend, present and document effectively.

PO11: Project Management and Finance: Ability to apply engineering and management principles.

PO12: Life-long Learning: The ability to engage in lifelong learning with advances in technology

Sanskrit is a Humanities and Social Sciences course being offered to 3rd to 5th semester B. Tech. students as a sequel of three courses of 2 credits each.

These courses enlighten students with fundamental knowledge of the language that has several treatises on ancient Indian engineering philosophy that would be relevant for their professional transactions as Engineers. The syllabus covers working knowledge of Sanskrit language along with study of selected texts which will equip engineering scholars to explore knowledge from ancient literature.

Pre-requisite Course Codes, if any.	
Course Objective: Learn basic Sanskrit language to be able to read and understand literature	
Course Outcomes (CO): At the end of the course students will be able to	
CO1	Understand basic Sanskrit Language
CO2	Make simple Sanskrit sentences
CO3	Exposed to different kinds of Sanskrit literature
CO4	Enhance memory power

Total Number Lectures: **28** Total Number of hours: **28 hours**

END OF SEMESTER WRITTEN EXAM: 15
VIVA QUESTION AND ANSWERS: 15
READING PASSAGE: 10
CLASS PARTICIPATION: 10
TOTAL MARKS: 50
DOUBLED FOR TOTAL MARKS OUT OF 100

COURSE OBJECTIVES

1. **GRAMMAR:** To be able to write and read correctly using appropriate parts of speech.

- This module covers the French Grammar from basics such as the **Alphabet** and the **Vowels**
- The importance of **Accents** and their use on vowels which change the meaning and pronunciation of the words **Article** (Definite and Indefinite)
- Unlike English where the nouns which are neuter the **Gender** of nouns in French play an important role (Masculine and Feminine). The **Number** of the noun (Singular and Plural) becomes equally important for the **Agreement of the adjectives**.
- At this basic level only the **Present Tense** conjugation of verbs will be taught.
- The student will be able to respond in the **Affirmative Mode** only.
- The student will be able to **conjugate verbs of regular ER group** along with the **CER, GER and YER verbs**, **ER ending Reflexive verbs**, the two auxiliary irregular verbs **Avoir and Etre** and the irregular verb **Aller**.
- The student will be able to write nouns in their **singular and plural formats**.

2. **VOCABULARY:**

The student will have a considerable amount of vocabulary available at his disposal regarding general topics such as Fruits, Vegetables, Animals, Clothing, Description of Paris/ France, numbers cardinal and ordinal from 0 to 69, names of countries, nationalities and languages spoken. Names of days, months and seasons. The student will also be able to express the weather in the different seasons. Short greetings and frequently used expressions will help the student get an immediate foothold into the language as he will be able to greet people and use appropriate phrases to communicate his gratitude or his pleasure or regret his inability to accomplish a task. The information on France and its culture will make the student familiar with French concepts.

3. **PHONETICS:** The student will be guided to communicate effectively using appropriate intonations, pronunciations and accents.

4. **NON-VERBAL COMMUNICATION SUCH AS GESTURES AND FACIAL EXPRESSIONS:**

The student will be guided in understanding non- verbal communication using gestures and facial expression that are typically French and that accompany the spoken language. These have very culture specific connotation and lend greatly in understanding the French language.
